

Secure
Verifiable
ADR Capture

SIMPLY POWERFUL

ADR Alert is a user-friendly, *Adverse Drug Reaction* logging system which facilitates the capture of ADRs from the field in a secure and verifiable way, ensuring reporting compliance.

ENSURING YOUR TEAM REPORT ADRs

ADR Alert offers a number of notification options such as SMS messaging to log the report. The Report is logged with a unique serial number and management and in-house pharmacovigilance are notified.

If the log notification was sent by SMS, the sender is requested by text over the next working day to submit a full report via the ADR Alert website.

The system automatically and verifiably transmits the full ADR to your company's pharmacovigilance unit, ensuring 100% reporting compliance.

READY TO RUN...

OR MAKE IT YOUR OWN

All flagging and escalation protocols can be customised to meet your unique requirements.

The report is automatically Date and Time stamped and issued with a unique Serial Number on log-in to allow easy identification and tracking.

The event report is automatically forwarded to your company's pharmacovigilance unit via verifiable electronic delivery. Date and Time stamping is recorded for verification.

An extensive Reporting Suite facilitates compliance verification. All ADRs can be sorted, viewed, printed and downloaded as required.

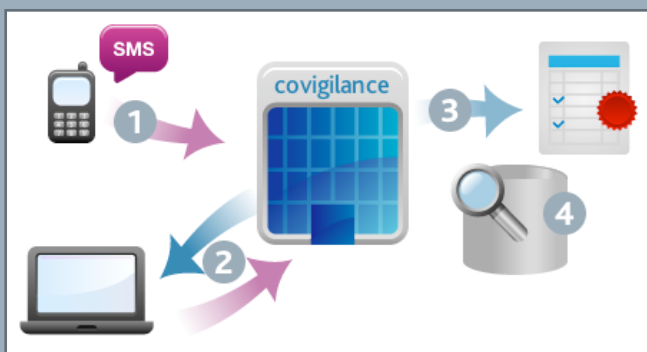

Your company's ADRs are held in one searchable database, ideally suited to both internal and external audit requirements.

The ADR Alert service is hosted by Combined Media on their secure network with access by licence fee.

ADR Alert also handles Product Complaints. The system offers full database functionality and flagging and escalation protocols can be customised.

THE PROCESS

SIMPLE TO UNDERSTAND, SIMPLE TO DO

1. ADR report initiated by your company Representative by a simple SMS message, mobile application or online. Management and Pharmacovigilance Department are advised of ADR.

2. Company Representative prompted by SMS to make full report via ADR Alert if required.

3. ADR logged with unique serial number, date and time stamp.

4. ADRs held in one searchable database. Reports suite allows full ADR analysis and compliance verification.
